PROJECTS

Rocker   Sep 2022 - Jan 2023
Gym platform connect trainer and user
- **Description:** AISC contest entry is a platform connecting users and trainers. Users can book courses with their preferred trainers and even become trainers themselves. The project prioritizes a seamless and user-friendly experience, featuring course listings, booking management, user profiles, and trainer certification.
- **Duties:** Develop frontend using MERN stack. Create interfaces for course listings, trainer profiles, and booking management. Integrate external APIs for payments and notifications. Design and implement MongoDB database structure.
- **Technologies:** Javascript, ReactJs, NodeJs, ExpressJs, MongoDB
- **Link project:** https://github.com/thanhphan20/Keyboard-Store

Rocker Android   Mar 2023 - Jun 2023
Social Network Gym Application
- **Description:** Mobile Application Development course final project involves creating a social network app for trainers and students. Trainers can manage courses, and students can enroll. The app includes a food tracker to monitor calorie intake.
- **Duties:** Develop the app using Java and Android Studio. Implement chat with Node.js API on a server. Store data in MongoDB via the API. Use Firebase for image storage in the app.
- **Technologies:** Java, MongoDB, Firebase
- **Link project:** https://github.com/HDNghia/app_gym_android

KBD - Keyboard Design   Apr 2022 - Jun 2022
Ecommerce Website About Keyboard
- **Description:** Web Application Development course - Ecommerce app using Laravel framework. Features include product listing, shopping cart, user registration, and order management. Admin panel built with Voyager for easy management.
- **Duties:** Front-end development, data modeling, and API development. Integrated role-based access control and implemented booking and prescription management systems.
- **Technologies:** Php, Laravel, MySQL
- **Link project:** https://github.com/thanhphan20/Keyboard-Store

Medicare   Apr 2022 - Jun 2022
Management Clinic System
- **Description:** Software Technology course - Human Resource Management System for healthcare. Advanced features include role management, booking, prescription, and integration with healthcare professionals.
- **Duties:** Front-end development, data modeling, and API development. Integrated role-based access control and implemented booking and prescription management systems.
- **Technologies:** Javascript, MongoDB
